

	Dyna-Flo	Cart-Trak
		
Carton Types	Varying Carton Sizes/Widths	Consistent Carton Sizes
Description	Dyna-Flo uses a full shelf bed of staggered polypropylene wheels for multiple SKUs and carton sizes. Easily handles frequent product mix changes.	Cart-Trak uses heavy-duty, full width rollers, available in a variety of width and capacities, to accommodate consistent carton and tote sizes.
Advantages	<ul style="list-style-type: none"> • Full wheel bed handles multiple cartons sizes • Dense wheel pattern provides greater carton density • Simple, easy product reprofiling • Easily drops into existing pallet rack • Durable wheel and axle assembly • Consolidates and increases pick slots 	<ul style="list-style-type: none"> • Heavy-duty abuse-resistant system • Ideal for consistent box sizes or totes • Less shelf density due to lane gaps vs. Dyna-Flo • Easily drops into existing pallet rack • Spans beam to beam on all rack types • Easy bracket attachments for all rack types
Specifications	<ul style="list-style-type: none"> ◇ 1 3/8" polypropylene staggered wheels ◇ 12"-16" wide sections – (6) 16" cover 96" beam ◇ Available in 1", 2" and 3" centers ◇ Adjustable full lane dividers 	<ul style="list-style-type: none"> ◇ 3/4" Galvanized steel rollers ◇ 6", 9", 12" and 16" widths ◇ 1", 2", or 3 roller centers ◇ Internal or external pick trays ◇ Slow down plates at discharge ends
Industry Applications	<ul style="list-style-type: none"> ◆ Foodservice distribution - numerous SKUs ◆ Grocery retail - high volume, changing SKUs ◆ Wholesale beverage - multiple SKUs, each picks ◆ Pharmaceutical - large variety, small cartons 	<ul style="list-style-type: none"> ◆ Beverage processing - beer, soda, wine cases ◆ Food processing - cases of cans and bottles ◆ Manufacturing - high volume standard cases ◆ Tote storage - full tote or each pick
