Warehouse Control System

What People Are Saying.....

Wow! I can see exactly what is going on with my conveyor and sorting system right from my computer & phone.....

Finally we have control of our processes, the data that is collected and graphed shows exactly where we need to improve.....

Most issues are resolved within minutes now that we have full knowledge and visuals with the PW360 Dash Board...

Getting Alerts right to my phone and email when specific faults happen really keep the down-time to a minimum...
